F G Wilson (Caterpillar Larne)

To improve manufacturing output of containerised diesel generators at the Larne plant Lindhurst Innovation Engineers manufactured a series of bespoke jigs & manipulators to assist in the manufacturing process of the generator housing units (10 to 45 feet in length). Within one month of commissioning the capacity doubled

- FG Wilson wished to improve manufacturing output of containerised diesel generators
- Bepoke Applications manufactured bespoke jigs & manipulators to assist the manufacture
- Generator housing units (10 to 45 feet in length)
- Within one month of commissioning the capacity doubled
- Design, Mechanical & Electrical services with fabrication & installation from Bespoke Applications department at Lindhurst Innovation Engineers
