Siemens Turbine Rotator

Siemens had a need to quickly repair two 120 tonne turbine assemblies at their Newcastle repair centre. The Bespoke Applications department at Lindhurst Innovation Engineers were approached to manufacture a rotating manipulator to accurately rotate the turbine assemblies at 1 rpm. From the initial enquiry to commissioning the equipment on site took six weeks

- Siemens had an urgent need to repair two 120 tonne turbine assemblies
- Lindhurst manufactured a rotating manipulator
- Accurately rotate the turbine assemblies at 1 rpm
- 6 week turnaround from the initial enquiry to commissioning the equipment
- Design, Mechanical & Electrical services from bespoke applications department at Lindhurst Innovation Engineers
